

# Zehnder Quaro

## Warmth with character

**zehnder**

always  
around you

Heating

Cooling

Fresh Air

Clean Air

**Puristic design for timeless look.** Opulent, baroque, retro, playful... You can quickly get fed up with a lot of design trends but the clear, concise shapes of the Bauhaus style always look fresh and modern. And will remain so in the future, which explains why the design of the new Zehnder Quaro bathroom radiator is consistently kept to just one idea: a right angle.

Not only is the frame of the designer bathroom radiator shaped as a continuous rectangle, but take a close look at the Zehnder Quaro and you'll only find 90° angles. Even the heating pipes are all square, producing a very harmonious overall look.

A beautifully pure look which lends the designer radiator real character. But despite all its "corners and edges", the Zehnder Quaro doesn't intrude into the room and instead slots perfectly into any modern bathroom ambience.

Timeless geometry  
Tangible benefits

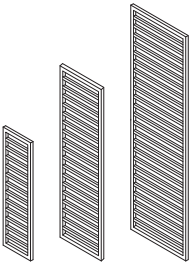

Clear, geometric shapes retain their attractiveness forever. The consistent use of right angles right down to the tiniest detail makes Zehnder Quaro a timeless, modern, designer bathroom object.

Constant design feature: square pipes in a square frame. Easy to clean.

Even though they are hidden behind the frame, the wall brackets are square too.

Heat in the third dimension

Room-based design: Zehnder Quaro is available as a room divider to fulfil both a formal and functional role. The warmth can be spread perfectly throughout the room and bath towels and other textile items can be easily hung up to dry or heat.

To suit every bathroom: available in many brilliant colours and surfaces, gloss or matt, also in chrome and stainless steel.

The large spaces between the heating pipes allow hand towels and other textile items to be hung up with ease.

Technical data

H = Height in mm  
L = Length in mm  
Φs = Standard heat output in accordance with EN 442, ΔT 50 K (75/65/20 °C)  
E = Electric heat output in W (mixed and electric-only operation)

Zehnder Quaro

Convenient 50mm centre valve connections with Comfort fittings and thermostat in chrome.

Convenient valve connections at opposite ends with Comfort fittings and thermostat in chrome.

Electric-only version with elegantly situated heating cartridge.

Infrared control unit for electrical operation with daily and weekly programs and timer functions.
