# UNLIMITED

Fits any plan

ARCHITECTURA  
— Collection —

# VARIETY IS THE BEST PLAN

Architectura has already made so many bathroom plans a success. But at Villeroy & Boch, we were convinced that we could make life even easier for project managers. Et voilà, the new Architectura collection has arrived. Revealing a design facelift for an even more streamlined and modern shape, additional sizes, new items and innovative features.

Architectura fits any plan because the collection masters the art of satisfying all bathroom design requirements: from the client's specifications to flawless functionality and aesthetic appeal.

# ARCHITECTURA IS NOW UNLIMITED

## MORE VARIETY FOR MORE POSSIBILITIES

The perfect space is something you very rarely come across. It is therefore even more important to work with a bathroom collection that offers both flexibility and high quality. This will make it possible to design impressive bathrooms for large projects or small spaces.

### WASHBASIN

Different sizes of washbasin, optionally with units, open up a wide range of design possibilities. Round, oval and square wash-basins are available in three installation versions.

### TAPS

Architectura and Architectura Square bring geometric design into the bathroom: two perfectly coordinating tap collections provide lots of scope for different looks.

### WELLNESS

As well as the built-in baths and six new back-to-wall baths, there are shower trays in a wide range of models and colours.

### FURNITURE

For the first time, the collection also includes furniture in five colours. The base units can be supplied in versions with drawers, doors or open surfaces.

### TOILET & BIDET

New wall-mounted toilets with the innovative TwistFlush[e<sup>3</sup>] vortex flush and with different seats meet individual requirements for design and efficiency.

### TWISTFLUSH[e<sup>3</sup>]

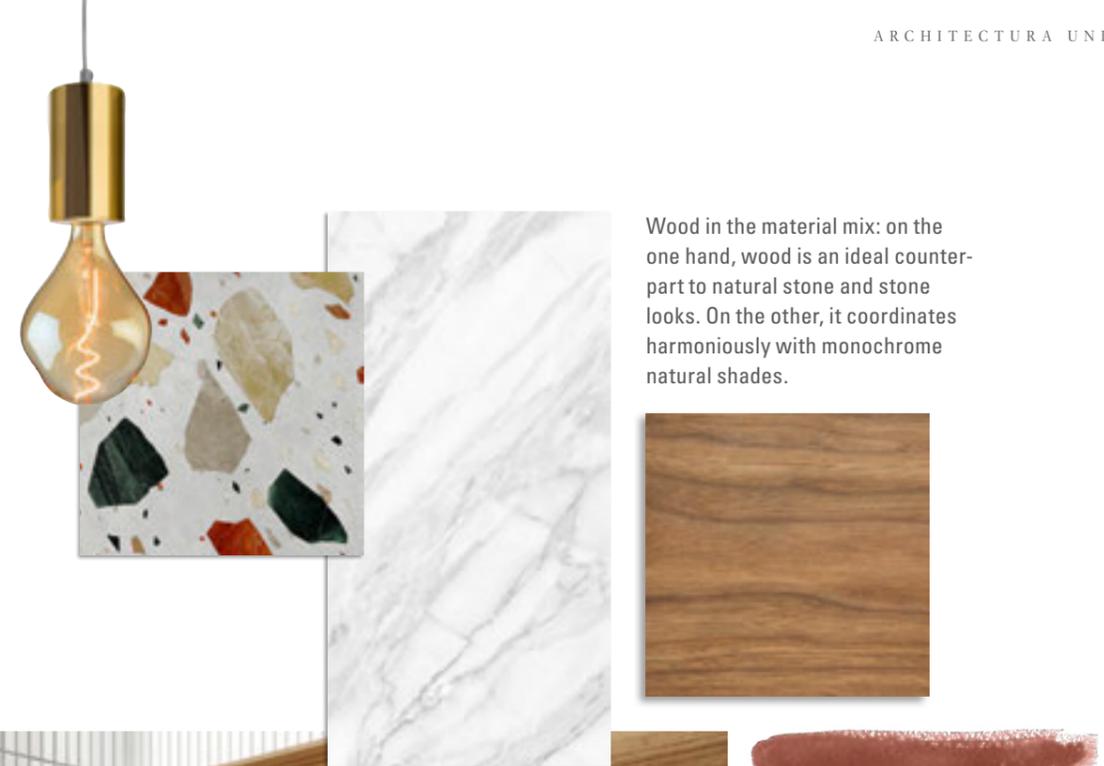

Maximum flushing power, reduced water consumption. TwistFlush[e<sup>3</sup>] is the sustainable and cost-efficient vortex flux technology at an attractive price.

# WOOD IN THE ROOM, WARMTH IN THE BATHROOM

## A NATURAL LOOK FOR A WELCOMING ATMOSPHERE

The trained eye instantly recognises the design possibilities offered by a room. An expressive colour concept is always an option. Instead of colour, materials can also be used to create different effects: wood brings a sense of warmth and a high-quality look in the bathroom. A few key pieces are all it takes.

With the Architectura bathroom furniture in Nordic Oak and Kansas Oak, it is very easy to add harmonious highlights – perfectly coordinating with a back-to-nature bathroom, a rustic look or northern minimalism.

Wood in the material mix: on the one hand, wood is an ideal counterpart to natural stone and stone looks. On the other, it coordinates harmoniously with monochrome natural shades.

Wall-mounted toilets convey an impression of lightness – an effect that is particularly useful in small bathrooms. For greater design scope, the selection includes two shapes (square and round) and three seat options.

# LIGHTHEARTED JOY WITH DARK ELEGANCE

## DEEP SHADES GIVE ROOMS EXCLUSIVITY AND CHARACTER

An elegant dark colour concept is a particularly timeless option for hotels and restaurants: colours such as forest green, night blue or black create a mysterious and sophisticated atmosphere. And thanks to flexible installation options, Architectura washbasins create inviting washing areas for every space scenario.

High-quality sanitary fittings such as toilets with advanced vortex flush systems and motion-control flush plates ensure maximum hygiene and cutting-edge technical standards. An aspect that contributes just as much to the exclusive atmosphere as colours and materials.

Matt black shows dark wood to best effect and creates visual balance in combination with light shades.

A bright touch works well too: for example, an impressive interaction of glossy and matt surfaces for tiles and wallpaper.

# CONCRETE AS A RECIPE FOR CLARITY

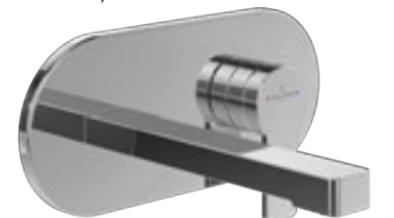

## A CLEAR STATEMENT WITH THE CONCRETE LOOK

Concrete is a modern design style that expresses cosmopolitan life. The concrete look infuses large surfaces such as floors and walls with calm energy. The effect can range from urban to industrial or minimalist.

The concrete look is not just for industrial lofts and modern apartments, it is a perfect choice for public washrooms too: combined with the clear geometric shapes of Architectura, chrome taps for a metallic touch and maritime blue shades, the overall effect is an inviting sense of clarity.

In combination with natural colours such as beige, anthracite and sea blue, the concrete look creates a welcoming and calm atmosphere.

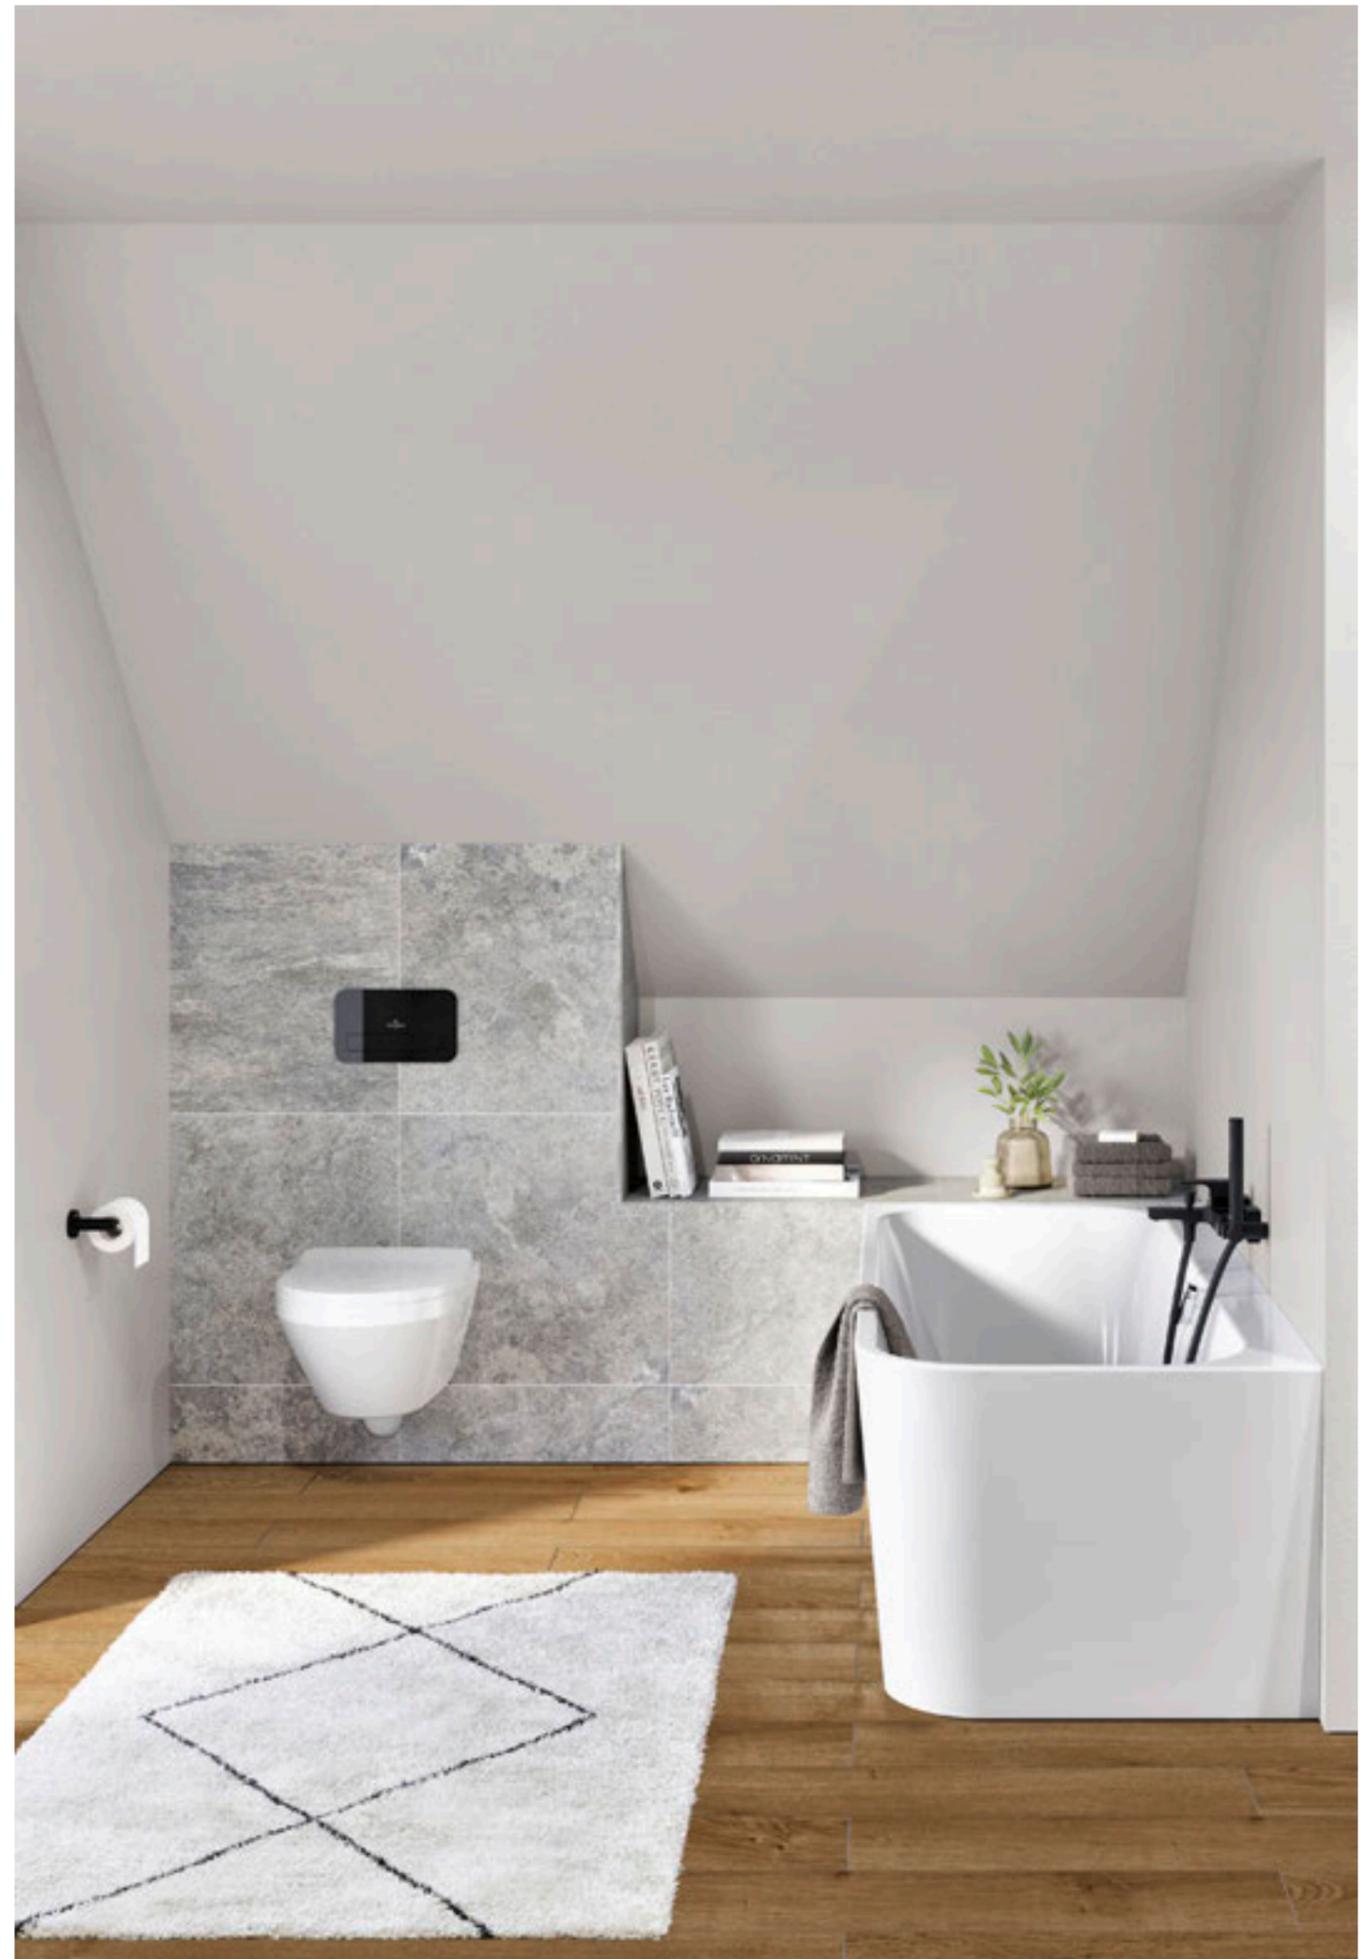

Architectura taps and the harmoniously coordinating Elements accessories will add shiny accents at the washbasin.

## FROM SPACE TO BATHROOM

### THE MOST IMPORTANT QUESTIONS ARE NOT ABOUT STYLE

The first consideration is: should the bathroom have a bath or just a shower? Does it need a compact washbasin for washing hands or a large washbasin with a vanity unit and lots of storage space? Another important question for the hospitality sector in particular: Is a toilet enough or will guests expect a bidet and urinal too? The next step is to consider the size of the space: are there clear specifications or room for creative scope? Once all wishes and possibilities have been clarified, the process of designing the bathroom with Architectura can begin.

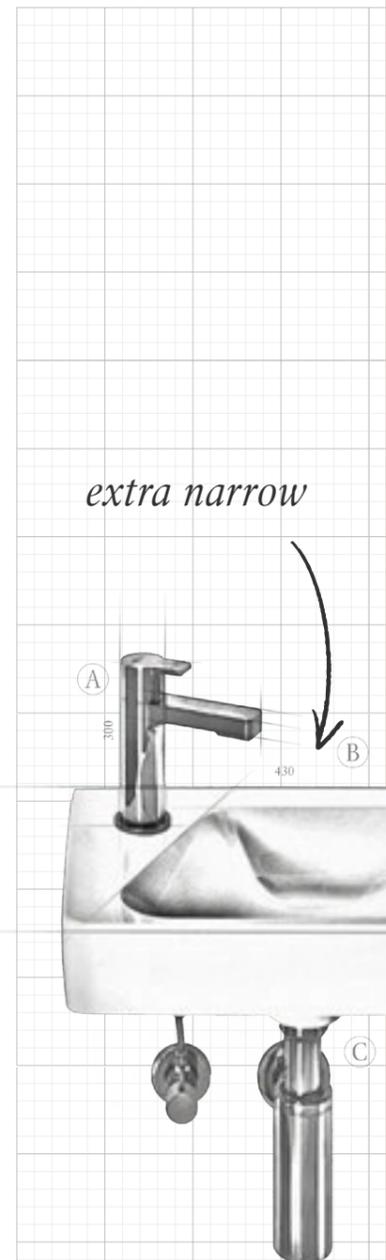

# THE SMALLEST OF BATHROOMS

## SPECIAL PRODUCTS FOR GUEST TOILETS

From small to very small: guest toilets often pose a particular challenge - ensuring freedom of movement in a restricted space. The Architectura range naturally also includes small washbasins and compact wall-mounted toilets.

“Slimline” bathroom ceramics can offer great advantages for planning. The Architectura handwashbasins are a perfect example with their low spatial depth and different widths.

## CLEVER USE OF SPACE IN THE BATHROOM

**IN A PREFABRICATED HOUSE, ARCHITECTURA MEETS A WIDE RANGE OF FUNCTIONS AND WISHES.**

Are you planning a family bathroom with lots of storage space, a wellness haven with a bath or an accessible bathroom with a large shower? Architectura can do all this. The sampling of the collection allows a wide range of combinations for personalised bathroom design with a complete bathroom from the Villeroy & Boch brand.

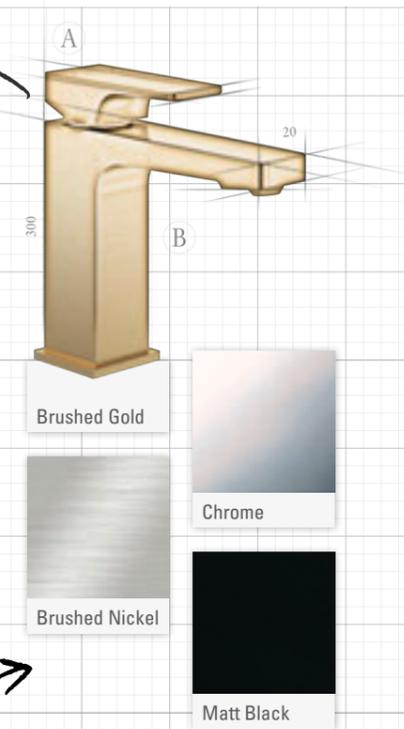

Vanity units in a wide range of sizes and colours provide storage space for towels and toiletries and add a personal note to bathroom design.

*Vanity units  
in different  
versions*

From an opulent look with Brushed Gold to urban coolness with Chrome: Architectura taps set the tone.

*Finishes as a style feature*

# STYLE IN THE BATHROOM

**BATHROOM DESIGN IS AN IMPORTANT UNIQUE SELLING POINT FOR HOTELS.**

A hotel's interior design style should ideally consider trends, general criteria such as price and durability, as well as an individual design language. Bathrooms make a major contribution to creating a premium and differentiating image for hotels. With its puristic urban design, trendy finishes and decors, Architectura supports a wide range of styles.

## THE BATHROOM AS A BUSINESS CARD

### FUNCTIONALITY THAT SHINES THROUGH

Easy to clean ceramics and excellent hygiene are prerequisites for attractive washrooms. The collection's novel features and durable products make Architectura an ideal choice for public bathrooms: the innovative TwistFlush[e<sup>3</sup>] vortex flush technology saves water and reduces cleaning time. The optional CeramicPlus and AntiBac surface finishes provide greater resistance to dirt to keep ceramics clean for longer.

Architectura toilets with TwistFlush[e<sup>3</sup>] ensure maximum cleanliness thanks to their rimless design and powerful vortex flush.

*Maximum vortex power*

# DESIGN FOR EVERY OCCASION

## THE COMPLETE BATHROOM COLLECTION WITH BOUNDLESS DESIGN POTENTIAL

Architectura fits in every project, every space and every budget. Our popular classic has now been extended with more products, sizes and features for an even better response to different space scenarios. But that's not all: the new design facelift gives the products' geometric shapes an even lighter and more modern look.

# THE KEY PIECE IN THE BATHROOM

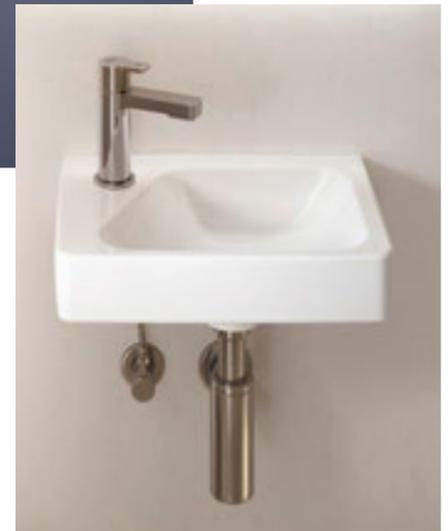

## WASHBASINS THAT MAKE A STATEMENT FOR FLEXIBILITY

Architectura washbasins offer endless scope for creative minds. From built-in models to undercounter, surface-mounted or wall-mounted washbasins – different installation methods and sizes create individual looks. In combination with the Architectura vanity units, the style options are even wider.

### FEATURE HIGHLIGHTS

- **AntiBac** provides a long-lasting antibacterial effect and has been shown to reduce bacterial growth by more than 99.9%.
- The dirt-resistant **CeramicPlus** surface finish makes sanitary ceramic easier to clean

# LOTS OF SPACE FOR ORGANISATION

## BATHROOM FURNITURE THAT BRINGS COLOUR AND STRUCTURE TO EVERY BATHROOM

From a unit with drawers to open shelves - Architectura furniture impresses with its flexibility. As well as creating storage space, it also adds highlights: with different decors and surfaces supporting both challenging and pragmatic interior design concepts.

### FLEXIBILITY FACTS

- Units for vanity washbasins in different versions with doors, drawers or open shelves - optionally with SoftClosing
- Can be combined with coordinating tall cabinets
- Available in the surface finishes of Glossy White, White Matt, Nordic Oak, Kansas Oak and Glossy Grey
- Practical drawer interior with an anti-slip base to keep everything in place

# A HANDLE ON STYLE

## TAPS AS A DEFINING DESIGN FEATURE

A tap plays an important role in setting the tone of a room. To ensure a harmonious look for taps and bathroom ceramic, the design and functionality of the Architectura and Architectura Square tap collections coordinate perfectly with all other elements in the collection. We call this Top Together.

Air  
Plus

Aqua  
Smart

Comfort  
Plus

Easy  
Clean

Smart  
Pressure

## FEATURE HIGHLIGHTS

- **AirPlus** provides a pleasant flow of water by adding air.
- **AquaSmart** limits the water flow to a maximum of 5 litres/minute
- **ComfortPlus** for a convenient tap height on surface-mounted washbasins
- **EasyClean** for easy cleaning and removal of limescale
- **SmartPressure** for a consistent flow of water even in the event of variations in pressure

# COMFORT IN ALL SIZES

## BATHS FOR EVERY SPACE CONFIGURATION

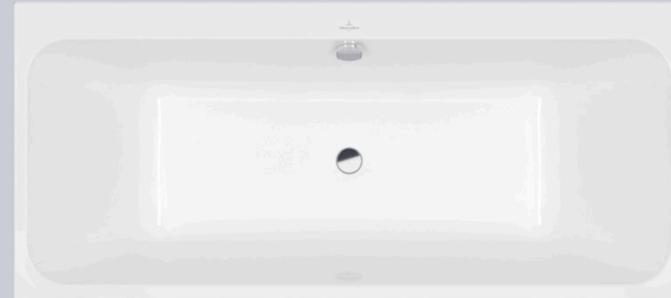

Baths are an important comfort feature. For this reason, great efforts are made in plans to make space for a bath even in small bathrooms. Variety helps here: as well as a wide selection of built-in baths, for the first time the Architectura collection also includes back-to-wall baths in two sizes, each available in three versions.

## FLEXIBILITY FACTS

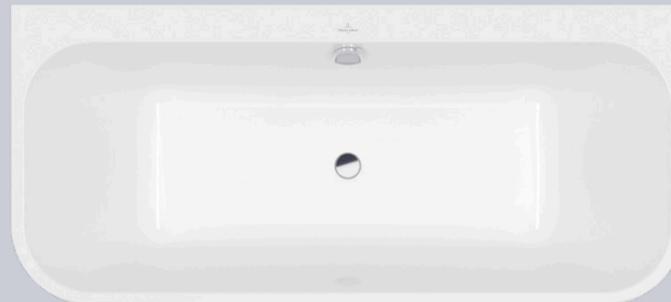

- Made from impact- and shock-resistant sanitary acrylic
- Whirlpool function available as an additional comfort option for all baths
- Airpools possible for back-to-wall baths

## BUILT-IN AND BACK-TO-WALL BATHS

# AN AWARD-WINNING SOLUTION

## SHOWER TRAYS COMBINING FLEXIBILITY AND DESIGN

Shower trays simply can't be flat enough or flexible enough - which makes Architectura the perfect choice. Its ultra-flat rimless design has already been recognised by the RedDot award. And the shower trays are available in three installation options: flush-fitting, on a base or directly on the tiles.

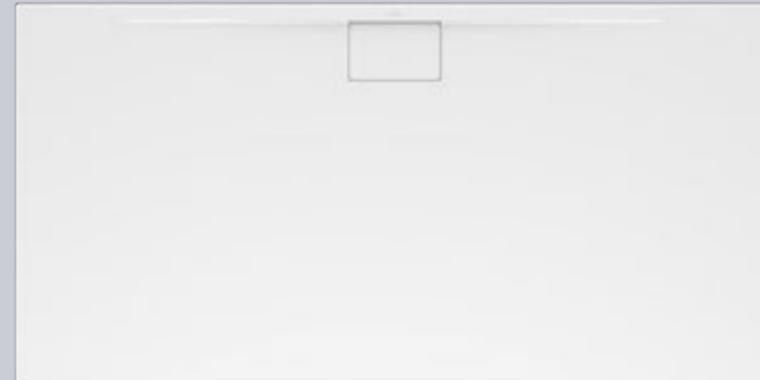

**Metal Rim**

### FEATURE HIGHLIGHTS

- Made from impact- and shock-resistant sanitary acrylic
- Available with optional Vibogrip anti-slip coating for secure grip and greater safety
- **MetalRim** - technology with galvanised steel reinforcement integrated in the rim

# TWISTFLUSH[e<sup>3</sup>]

## MAXIMUM VORTEX POWER AT AN ATTRACTIVE PRICE

Villeroy & Boch's TwistFlush[e<sup>3</sup>] technology is a pioneering new flushing system - developed specially for use in public and commercial sanitary facilities and residential construction projects. This advanced flushing technology is setting new standards for efficiency and water saving. Thanks to the combination of a powerful vortex flush and an intelligently designed bowl architecture, TwistFlush[e<sup>3</sup>] provides thorough and splash-free flushing of the entire surface: an innovation that pays dividends in every project.

Good arguments for TwistFlush[e<sup>3</sup>]:

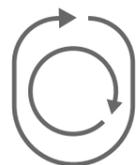

- A company with 1,000 employees can save up to **675,000 litres of water per year**
- **Twice as fast to clean** as a toilet with a rim
- Exceeds the requirements of the **European standard EN 997** by a factor of ten for flushing of plastic balls

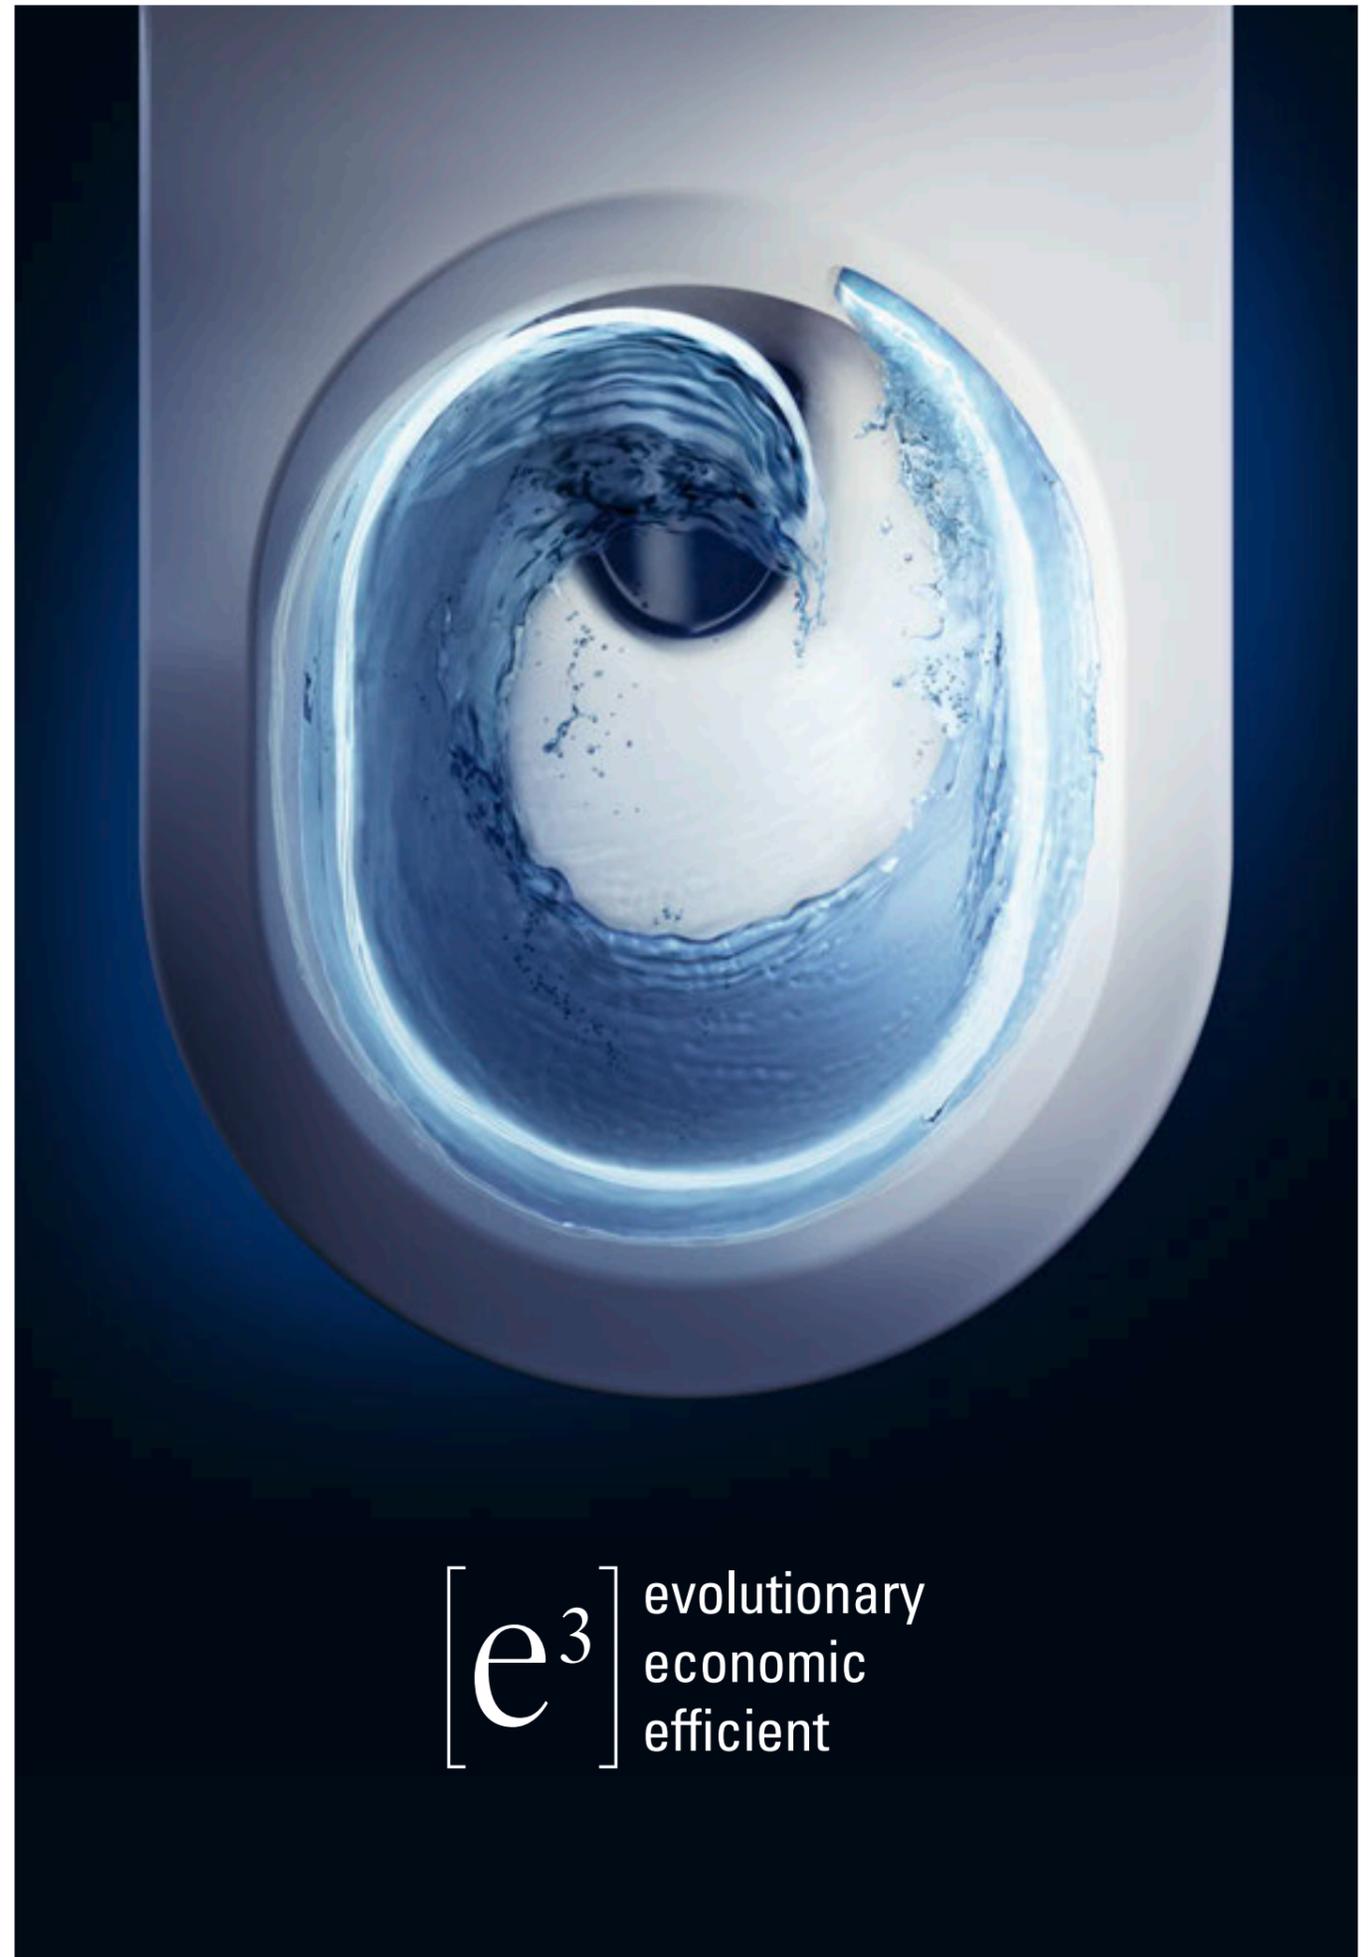

**evolutionary**  
revolutionary price

**economic**  
minimum water consumption

**efficient**  
powerful flushing performance

**[e<sup>3</sup>]** evolutionary  
economic  
efficient
